

## What does this mean for our patients?

With an approved referral from a provider, BPIC can provide financial aid for:

- **Diagnostic / Radiology Studies**
  - 30/30/40 plan whereby BPIC and BGH pay 30% of the study with the patient being responsible for 40%. BGH does have a sliding scale through their BGH Cares program for further patient assistance.
- **Lab Work**
- **Medical Supplies**
- **Prescription Medications**
- **Specialist Referrals**
  - BPIC will cover the initial \$100 of a specialist consultation

## Providing a financial health care safety net for those in our community who are uninsured or underinsured.

The past few years have seen many changes in our lives and our community. We have navigated an unprecedented situation together, we have watched our community grow, and we have seen the needs of our community alter in a number of unexpected ways. Through it all, BPICC has continued to provide free, quality care to the uninsured, both by telehealth and in-clinic visits.

Yet over the past few years, we have seen our patient demand for primary care services decline, in part because of Medicaid expansion which has provided many of our patients access to much needed health insurance, and in part because of our local community health center which exists to fill the health care safety gap for primary care services. What remains is a continued need for resources to access specialty care.

In our ongoing commitment to remove barriers to health care, we soon realized that some changes were in store for us too.

We are excited to announce that on January 1, 2023, Bonner Partners in Care Clinic will become Bonner Partners in Care - a granting organization for individuals in need of a resource to help pay for medications, lab work, imaging, specialty care and other diagnostic services. If your provider is recommending a test or lab that you cannot afford, they can submit a simple request for funding from BPIC. Our mission remains the same- providing a financial health care safety net for those in our community who are uninsured or underinsured.
